Hydraulic Cylinder Servicers
Every business is different, all have different needs. Some shops service cylinders infrequently while others make it their primary business. Instead of taking a product and forcing it to fit your business — Tuxco understands that different shops need different models, each with unique features so that one is just right for you.

You may choose advanced models with high productivity features — like automatic hydraulic functions — or you may decide the lower-priced manual models, with slower speeds, are adequate for your business.

Whatever Tuxco cylinder servicer you select, you will have the security of knowing that Tuxco’s 60+ years of experience guarantees safer, more profitable, high integrity repairs. Our proven products paired with our exceptional product support will help you build customer loyalty for your business for years to come.

**What do you need?**

**HCS-25-LS**

Applies 25,000 ft-lb (3457.5 kg-m) of torque to remove threaded glands and piston retaining nuts and insert/extract piston rods. The HCS-25-LS features an electric hydraulic power supply, faster extraction, 48 in (1219.2 mm) stroke, a valve operated double acting indexing cylinder, and a single acting torquing cylinder.

**HCS-2520**

Similar to the HCS-25-LS, but needs only compressed air to function. The HCS-2520 is designed to service cylinders 26 ft (7.9 m) in length and 22 in (558.8 mm) in diameter.

---

**Features**

- **All models come with built-in spanner wrench for threaded glands**
- **Universal high torque wrench and torque gauge are included**
Ask us about our customized hydraulic cylinder servicers capable of handling cylinders up to 80 feet in extended length

**TUXCO Representatives**

are available to answer any questions about our full-line of Hydraulic Cylinder Servicers, and help you decide which machine is best suited for your shop.

---

**HCS-30**

Faster machine for a busier shop. Electric powered 5 hp (3.7 kW) motor powers a double acting torquing cylinder providing 30,000 ft-lb (4149 kg-m) of torque. Motor also powers a double acting cylinder to quickly extract and insert piston rods.

---

Did you know...

Tuxco Hydraulic Cylinder Servicers are in daily use on SIX of the World’s SEVEN Continents!

---

**HCS-40**

Similar to the HCS-30 model, but the HCS-40 is designed to provide 40,000 ft-lb (5532 kg-m) of torque. This model will service cylinders 26 ft (7.9 m) in length and 22 in (558.8 mm) in diameter.

---

*Floor mounting hardware is included with all models*

*Power units are wired to customers needs regarding voltage and frequency*
Tuxco offers a full range of hydraulic cylinder servicers, from 10,000 lb-ft of torque all the way up to 60,000 lb-ft

HCS-60/ HCS-60-L

Ultimate for large and busy hydraulic service centers. Features eight push button controlled, high speed hydraulic functions. Headstock torquing device quickly removes and replaces threaded glands. Workstation moves so it’s not necessary to remove the cylinder barrel when repairing pistons. Quickly extracts and replaces piston rods. Quickly adapts for different sized cylinders. HCS-60-L model handles longer cylinders and has special adapters to handle Hitachi 1800 and 3500 boom cylinders.
