Model CBW-300 Cylinder Barrel Washer

Dirt and honing debris are every hydraulic systems' worst enemies. TUXCO's CBW-300 Cylinder Barrel Washer guarantees that cylinders will be contaminant free when they are reassembled.

The CBW-300 uses rotation pressure, spray nozzles and rotating brushes to make repaired cylinders factory clean. A powerful 100% air operated, 12 GPM diaphragm pump circulates cleaning solution to flush all debris out quickly. Two sets of brushes handle cylinders from 4" to 13½" bores.

Whether it be cleaning solution, dirt, or debris, nothing goes down the drain. The effluent exits the cylinder under a splash guard to keep the work area clean and dry. It then passes through our two-step filter system, first a set of two 25 micron filter bags, before being pumped through the 3 micron filter stack. The fluid is then returned to the stainless steel tank for reuse. Debris is trapped by the filter bags and disposed of with the shops' dry waste. It is a system designed for maximum productivity and to help avoid OSHA and EPA violations.

Like all other Tuxco products, the New & Improved Tuxco CBW-300 Cylinder Barrel Washer is shipped complete, ready to use when it arrives at your shop. The unit is now 100% air operated, and no electricity is required. By simply connecting shop air to the unit, it drives the diaphragm pump, variable speed brush and nozzle head, and flushing adapter.

***THOROUGH CYLINDER CLEANING IMPROVES INTEGRITY.....
.....AND IT HAS NEVER BEEN EASIER, QUICKER, CLEANER, or MORE ECONOMICAL!***

SPECIFICATIONS:

Tank Material - Stainless Steel

Tank Capacity - 70 Gallons (265 Liters)

Pump Type - Diaphragm

Pump Capacity - 12 GPM (45 LPM)

Power Required - 100% Air Operated / No Electricity Required

SPECIAL FEATURES OF THE CBW-300 CYLINDER BARREL WASHER:

- Low Friction Caster Wheels
- Removable Catch Basin for Easy Cleaning
- (2) Sets of Two—25 Micron Filter Bags for Catch Basin
- 3 Micron Spin-On Filter for Recirculation System
- Visual Contamination Indicator for Recirculation System
- Quick Disconnect Solvent Hose Assembly
- Rotating Nozzle Head and Brush Holder
- Set of Six - 3" Bristle Brushes (Tuxco No. 11657)
- Set of Six - 6" Bristle Brushes (Tuxco No. 11658)
- Air Powered, Variable Speed Brush and Nozzle Drive Unit
- Flushing Adapter for Cleaning Built-In Plumbing & Manifolds
- 8' and 12' Extension Shafts
